

GOLD MINE DISCOVERED

WOULD YOU BE SURPRISED if we tell you that we have discovered a gold mine in Kaimuki, and at the same time have not done any digging excepting that which was necessary to make street improvements? Well, it is true. We have discovered a valuable gold mine in the Kaimuki air. It is no unusual thing to find a gold mine up in the air, as probably many of you know who have had experience in buying mining stocks, but it is very seldom that you find the air itself to be a gold mine. Kaimuki's cool, and invigorating air will assay 100 per cent pure, and is far more valuable, and healthful than any mineral the world has ever known. The rich vein in this wonderful health-producing gold mine, is the Koko Head breeze, constantly sweeping the entire district, and passing over every lot in the Ocean View, and Palolo Hill Tracts. When this breeze comes in contact with the bright sunshine, and semi-arid condition found at Kaimuki's splendid elevation, and location, it pays a daily dividend in health, and the stockholders, or lot owners in this rapidly growing district, will receive these health-giving dividends as long as they live there, regardless of any political, or financial disturbances. We have hundreds of stockholders who have been made happy, and prosperous, by the health dividends of

Kaimuki's Gold Mine Climate

The leading physicians of this city, have carefully examined, and assayed this wonderful health-producing climate, and we submit their signed report, reading as follows: "In our opinion the Kaimuki climate has all the salient characteristics required from the hygienic, and curative standpoints to assist in securing relaxation, rest, health, and prolonged life." We also have hundreds of letters from our satisfied stockholders, expressing favorable opinions in regard to the manner in which their health has profitted by Kaimuki's gold mine climate. We submit one of these letters sent us by Mr. L. E. Thayer of this city, as follows:

Honolulu, Feby. 14th, 1911.

Kaimuki Land Company, Ltd.:

Gentlemen:--

Five years ago I came to Honolulu somewhat broken in health. Three years ago two leading physicians examined me, pronounced mine a bad case of lung trouble, and ordered me to Colorado at once. Instead I bought a cottage in Ocean View, Kaimuki, and built a lanai facing Koko Head. I have since gained thirty pounds, and I am now never so well as when I can breathe the pure air of Kaimuki.

Yours truly,

(Signed) L. E. Thayer.

The Kaimuki Climate is a Gold Mine for those Seeking Health,
and a Beautiful Place to Live.
